Supplying Debur tank with Channel water.

Mr. K. Venkatasubbaiya of Nanjangud.

*Summary of discussion.*—The tank which was constructed for supplying water to the Nanjangud kasaba during summer, has become useless as its water percolates. This has led to the insufficient water-supply during summer. Though the channel is opened once a month the reservoir does not supply water for more than 15 days. It is therefore proposed to fill the Debur tank with channel water during summer so that it may supply the Nanjangud town with drinking water at all seasons.

*Reply of Government.*—This is not possible.

Sanitation at Nanjangud.

Mr. K. Venkatasubbaiya of Nanjangud.

*Summary of discussion.*—There are no conservancy roads at Nanjangud. There is immense traffic between Nanjangud and Mysore. The Sanitary Engineer after inspection has marked out the places where congested parts are to be opened and conservancy roads formed. As no funds are available in the Municipality the above work has not been taken up. It is therefore proposed that Government loan of Rs. 5,000 may be granted to the Municipality to execute the above Sanitary work and to recover the amounts within five years by revising the house tax.

*Reply of Government.*—Let the Municipality apply in due course, when very favorable consideration will be given. Improvements are desirable.
